Patch Policy Release Notes

Introducing Patch Policy updates

Patch Policy updates are released once a month. Patch Policy updates add, enhance, and update the Patch policy and associated template files on the Symantec ESM manager. Symantec updates patch templates with the Symantec ESM policy installer.

Policy updates through LiveUpdate

There are two content update packages for Patch Policies for different versions of ESM. For 6.0 and 5.5 managers, select the Patch Policies - OS Patches for 5.5/6.0 LiveUpdate package in the Enterprise Security Manager Content Updates section. For 6.5 managers, select the Patch Policies - OS Comprehensive LiveUpdate package in the Enterprise Security Manager 6.5+ Content Updates section. The Comprehensive package contains checks that apply to platforms that are supported only on ESM 6.5.

The policy installer executable applies to all versions of ESM and is available at: <http://securityresponse.symantec.com/>

Note: If Java is installed on a Solaris 9 agent, install the JDK using the tar archive file containing packages, available from Sun. If you install the JDK using a self-extracting shell archive file, the module will not report vulnerability information for it because no specific packages are installed.

Note: SU26 now supports Solaris x86. If you do not have the modules current with SU26, you will see duplicate messages for patches. In order to remove these you must update your modules to SU26 or newer.
