Technical Support

Symantec Technical Support maintains support centers globally. Technical Support's primary role is to respond to specific queries about product features and functionality. The Technical Support group also creates content for our online Knowledge Base. The Technical Support group works collaboratively with the other functional areas within Symantec to answer your questions in a timely fashion. For example, the Technical Support group works with Product Engineering and Symantec Security Response to provide alerting services and virus definition updates.

Symantec's support offerings include the following:

- A range of support options that give you the flexibility to select the right amount of service for any size organization
- Telephone and/or Web-based support that provides rapid response and up-to-the-minute information
- Upgrade assurance that delivers software upgrades
- Global support purchased on a regional business hours or 24 hours a day, 7 days a week basis
- Premium service offerings that include Account Management Services

For information about Symantec's support offerings, you can visit our Web site at the following URL:

www.symantec.com/business/support/

All support services will be delivered in accordance with your support agreement and the then-current enterprise technical support policy.

Contacting Technical Support

Customers with a current support agreement may access Technical Support information at the following URL:

www.symantec.com/business/support/

Before contacting Technical Support, make sure you have satisfied the system requirements that are listed in your product documentation. Also, you should be at the computer on which the problem occurred, in case it is necessary to replicate the problem.

When you contact Technical Support, please have the following information available:

- Product release level

- Hardware information
- Available memory, disk space, and NIC information
- Operating system
- Version and patch level
- Network topology
- Router, gateway, and IP address information
- Problem description:
 - Error messages and log files
 - Troubleshooting that was performed before contacting Symantec
 - Recent software configuration changes and network changes

Licensing and registration

If your Symantec product requires registration or a license key, access our technical support Web page at the following URL:

www.symantec.com/business/support/

Customer service

Customer service information is available at the following URL:

www.symantec.com/business/support/

Customer Service is available to assist with non-technical questions, such as the following types of issues:

- Questions regarding product licensing or serialization
- Product registration updates, such as address or name changes
- General product information (features, language availability, local dealers)
- Latest information about product updates and upgrades
- Information about upgrade assurance and support contracts
- Information about the Symantec Buying Programs
- Advice about Symantec's technical support options
- Nontechnical presales questions
- Issues that are related to CD-ROMs or manuals

Support agreement resources

If you want to contact Symantec regarding an existing support agreement, please contact the support agreement administration team for your region as follows:

Asia-Pacific and Japan	customercare_apac@symantec.com
Europe, Middle-East, and Africa	semea@symantec.com
North America and Latin America	supportsolutions@symantec.com

Introducing Patch Policy updates

This chapter includes the following topics:

- [About the Patch Policy updates](#)
- [Getting Patch Policy updates through LiveUpdate](#)
- [Enhancements to the Patch module in Security Updates](#)

About the Patch Policy updates

The Patch Policy updates are released twice a month. These updates add, enhance, and update the Patch policy and the associated template files on the Symantec ESM manager. Symantec updates the patch templates with the Symantec ESM policy installer.

Getting Patch Policy updates through LiveUpdate

To get Patch policy updates through LiveUpdate for 6.5 and later managers, select the Patch Policies - OS Comprehensive LiveUpdate package in the Enterprise Security Manager 6.5 and later Content Updates section. The Comprehensive package contains the checks that apply to the platforms that are supported only on ESM 6.5 and later.

The policy installer executable applies to all versions of ESM and is available at the following location:

<http://securityresponse.symantec.com/>

- Note:** As per the End of Life product support policy, ESM Patch policy updates on ESM 6.0 or earlier are not supported from Patch Policy (Windows) Update 2008.10.02.
- Note:** If Java is installed on a Solaris 9 agent, install the JDK using the tar archive file containing packages, available from Sun. If you install the JDK using a selfextracting shell archive file, the module will not report vulnerability information for it because no specific packages are installed.
- Note:** SU 26 now supports Solaris x86. If you do not have the current modules for SU 26, you will see duplicate messages for patches. To remove these duplicate messages, you must update your modules to SU 26 or newer.

Enhancements to the Patch module in Security Updates

Every Security Update includes updates to the Patch module. Upgrading to the latest Security Update provides you with the most accurate patch detection.

[Table 1-1](#) describes the enhancements to the Patch module in the latest Security Updates.

Table 1-1 Support and enhancements in Security Updates

Security Update	Upgraded support and enhancements
Security Update 20	Added support for Windows Server 2003 64-Bit Itanium-based systems Added support for SUSE Linux Enterprise Server 8
Security Update 21	Added support for HP-UX 11i v2 Added regular expression support for the file version field for Windows patches utilized in checking Windows Media Player patches

Table 1-1 Support and enhancements in Security Updates (*continued*)

Security Update	Upgraded support and enhancements
Security Update 22	Added support for AIX maintenance releases and superseding patches. Added support for the following operating systems: ■ IBM AIX 5.3 ■ Red Hat Enterprise Linux AS 3.0 on Itanium, EM64T, and AMD64 ■ Red Hat Enterprise Linux WS 3.0 on AMD64 ■ SUSE Linux Enterprise Server 9 for x86
Security Update 23	Added support for SUSE Linux Enterprise Server 9 on Itanium Added support for Red Hat Linux Workstation 3 for Xeon (EM64T) Added wildcard support for registry keys Added patch results summary support Added list installed patches support Added service state messages support
Security Update 24	Added support for Red Hat Enterprise Linux 4 ES (x86) Added Veritas Backup Exec product support Added script transfer to agent support Added Solaris Role Based Access Control support Added Solaris 2.10 zone support
Security Update 25	Added support for the following operating systems: ■ Red Hat Enterprise Linux 4 AS on Opteron and Itanium ■ Windows Server 2003 Enterprise 64-bit on Opteron and Xeon ■ Added UNICODE support for AIX 433
Security Update 26	Added support for Solaris 10 on x86, x64 Added File System Entitlement module
Security Update 27	Added support for the following systems: ■ Red Hat Enterprise Linux 4 AS (Xeon) ■ Windows Server 2003 R2 (x86, x64)
Security Update 28	Added support for SUSE Linux Enterprise Server version 10

Table 1-1 Support and enhancements in Security Updates (*continued*)

Security Update	Upgraded support and enhancements
Security Update 30	Added support for Microsoft Windows Vista (x86, Opteron and EM64T) Editions
Security Update 31	Added support for Red Hat Enterprise Linux 5 (x86, Opteron, EM64T, and IA64-bit)
Security Update 31.08	Added support for Red Hat Enterprise Linux 5.x on IBM z-series (s390x)
Security Update 32	Added support for SUSE Linux Enterprise Server 9/10 (Opteron and EM64T) and ESX Server 3.0.2 (x86, Opteron)
Security Update 34	Added support for the following operating systems: ■ Microsoft Windows Server 2008 (x86) ■ Microsoft Windows Server 2008 64-bit (EM64T, Opteron) ■ Microsoft Windows Server 2008 64-Bit Itanium ■ HP-UX 11.23 on PA-RISC
Security Update 35	Added support for the following operating systems: ■ HP-UX 11.31 on Itanium ■ HP-UX 11.31 on PA-RISC ■ IBM AIX 6.1 ■ Added support to handle Service Pack Entry for Windows Server 2003 64-bit (Opteron and EM64T) and Windows Vista 64-bit (Opteron and EM64T) template file. ■ Added support to handle template size greater than 3MB for HP-UX. For more information regarding this update, download the Patch Policy Release Notes from the following link: Symantec_ESM_Patch_Policy_Release_Notes_20080801.pdf
Security Update 36	Added support for the following operating systems: ■ SUSE Linux 9 on IBM zSeries (s390x) ■ SUSE Linux 10 on IBM zSeries (s390x)
Security Update 37	Added support for the following operating systems: ■ Red Hat Enterprise Linux Server 5 on PPC e-server

Table 1-1 Support and enhancements in Security Updates *(continued)*

Security Update	Upgraded support and enhancements
Security Update 38	Added support for the following operating systems: ■ AIX VIO Server 2.1 on AIX 6.1 ■ SUSE 11 on x86, Opteron and EM64T, Itanium, zLinux, and PPC e-Server ■ Oracle Enterprise Linux 5.2, 5.3 on x86, Opteron and EM64T
Security Update 39	Added the support for the follwoign operating systems: ■ Support for Windows 7 on x86 and Opteron ■ Support for Windows 2008 R2 on Itanium, Opteron, and Xeon

About the Patch policy 2010.06.08 release

This chapter includes the following topics:

- [What is new](#)
- [Template updates](#)
- [New patches](#)

What is new

This patch update for Symantec Enterprise Security Manager reports the operating system and application patches for UNIX operating systems. There are a total of 2526 new patch signatures and 1 updated patch signatures in 7 templates.

The following is a summary of the updates:

- oel-patch.plx (Oracle Enterprise Linux - 106 new)
- patch.pai (IBM AIX - 4 new)
- patch.ph1 (HP-UX 11.00 - 11.31 PA-RISC - 17 new)
- patch.ph2 (HP-UX 11.23 - 11.31 for Itanium-based systems - 17 new)
- patch.plx (RedHat Linux and Enterprise Linux - 1827 new)
- patch.ps6 (Sun Solaris 2.6 + - 28 new, 1 updated)
- patch.psl (SUSE Linux - 527 new)

Template updates

Table 2-1 lists the information about the templates that have been updated or added for various applications and operating systems.

Table 2-1 Templates information for Windows and UNIX operating systems

Template version	Template file	Application on operating system
3127	exchg2k.ps5	Microsoft Exchange Server 2000 on Microsoft Windows 2000 Server and Windows 2000 Advanced Server
3079	exchg2k3.p6s	Microsoft Exchange Server 2003 on Microsoft Windows Server 2003
3079	exchg2k3.ps5	Microsoft Exchange Server 2003 on Microsoft Windows 2000 Server and Windows 2000 Advanced Server
15	exchg2k7.p6s	Microsoft Exchange Server 2007 on Microsoft Windows Server 2003
11	exchg2k7.p8s	Microsoft Exchange Server 2003 on Microsoft Windows 2008
11	exchg2k7.ps8	Microsoft Exchange Server 2007 on Microsoft Windows Server 2008 (Opteron and EM64T) Editions
14	exchg2k7.p64	Microsoft Exchange Server 2007 on Microsoft Windows Server 2003 64-bit (Opteron and EM64T)
1	exchg2k10.pS8	Microsoft Exchange Server 2010 on Microsoft Windows 2008 Server 64-bit (Opteron and EM64T)
1	exchg2k10.p2S8	Microsoft Exchange Server 2010 on Microsoft Windows 2008 R2 Server 64-bit (Opteron and EM64T)
3118	exchg55.ps5	Microsoft Exchange Server 5.5 on Microsoft Windows 2000 Server and Windows 2000 Advanced Server
46	ie.p3i	Microsoft Internet Explorer on Microsoft Windows Server 2003 for 64-Bit Itanium-based Systems
